This font covers languages written with latin alphabets as well as those written using cyrillic alphabets (except Abkhazian), Greek (both monotonic and polytonic), Armenian and Georgian. For variations of the latin, cyrillic, and greek alphabets I attempt to show the whole alphabet, followed by Article 1 of the UDHR (it is traditional!). For the other scripts and languages I merely display the digits (if not common 0..9) and Article 1.

## 6 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use ‘...’ or “...” but in good text there are variations and this font supports:

left and right single quotes ‘...’      quotes „...“  
left and right double quotes “...”      guillemets «...» and angle quotes <...>  
single turned comma, right single quote ‘...’  
double low 9 and left double

In Spanish languages, the inverted exclamation-mark ¡ and inverted question-mark ¿ are necessary.
