FandolKai (FandolKai-Regular.otf v0.3)

This font covers English, Simplified Chinese and Yi. The cyrillic glyphs are too widely-spaced to be usable. For variations of the latin, cyrillic, and greek alphabets I attempt to show the whole alphabet, followed by Article 1 of the UDHR (it is traditional!). For the other scripts and languages I merely display the digits (if not common 0..9) and Article 1.

Sources:

https://en.wikipedia.org

This document was prepared using XeTeX and fontspec. Depending on the font, missing glyphs will be replaced either by nothing at all (occasional fonts do that), a blank space, an empty box, or some other symbol indicating a missing glyph.

1 CJK scripts

1.1 Mandarin Chinese (simplified)

人人生而自由, 在尊严和权利上一律平等。他们赋有理性和良心，
并应以兄弟关系的精神互相对待。

2 Other Asian scripts

2.1 Yi (China)

3 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use ‘...’ or “...” but in good text there are variations and this font supports:

left and right single quotes ‘...’ and for traditional chinese and
left and right double quotes “...” japanese
single turned comma, right single corner brackets 「...」
quote ‘...’
white corner brackets [「...」]
angle quotes <...>
4 Symbols

4.1 Currency Symbols

Many countries have symbols for their currencies. In alphabetic order:

- Cedi (Ghana)
- Cent (many places)
- Colon (Costa Rica, El Salvador)
- Cruzeiro (Brazil)
- Dollar (many places)
- Dong (Vietnam)
- Euro
- Hryvnia (Ukraine)
- Manat (Azerbaijan)
- Naira (Nigeria)
- Pound Sterling
- Rouble (Russia)
- Tenge (Kazakhstan)
- Turkish Lira
- Won (Korea)
- Yen (Japan)

4.2 Other symbols in text

- Copyright
- Dagger
- Double Dagger
- Per mille
- Pilcrow
- Registered
- Section
- Trademark
