

Goudy Bookletter 1911 (GoudyBookletter1911.otf)

This font, which does not have bold or italic faces, covers some European languages written in latin alphabets. Of the languages it covers, it omits the precomposed l-with-middle-dot for Catalan.

For variations of the latin, cyrillic, and greek alphabets I attempt to show the whole alphabet, followed by Article 1 of the UDHR (it is traditional!). For the other scripts and languages I merely display the digits (if not common o..9) and Article 1.

## 2 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use `...` or `"...`" but in good text there are variations and this font supports:

left and right single quotes ‘...’	double low 9 and left double quotes „...“
left and right double quotes “...”	guillemets «...» and angle quotes <...>
single turned comma, right single quote ’...’	

In Spanish languages, the inverted exclamation-mark ¡ and inverted question-mark ¿ are necessary.
