

Noto Sans Mono (NotoSansMono-Regular.ttf 2023-05-24)

This Monospace Sans Font covers all languages written with variations of the latin, cyrillic and greek alphabets. For Eng it uses the N-with-tail shape preferred in african languages.

It does not have an italic variant.

For variations of the latin, cyrillic, and greek alphabets I attempt to show the whole alphabet, followed by Article 1 of the UDHR (it is traditional!). For the other scripts and languages I merely display the digits (if not common 0..9) and Article 1.

This document was prepared using X_ƎT_EX and fontspec. Depending on the font, missing glyphs will be replaced either by nothing at all (occasional fonts do that), a blank space, an empty box, or some other symbol indicating a missing glyph.

This font comes with a SMALL CAPITALS version (i.e. normal capitals with smaller ones replacing the lowercase), used in this example for quoting Death from the late Sir Terry Pratchett's discworld :

"ON A NIGHT LIKE THIS," said Death, "THE ONLY CERTAIN THING IS UNCERTAINTY. TRITE, I KNOW, BUT TRUE." Somewhere on the horizon, thunder rumbled. "I'll, er, just be sort of going, then." said Rincewind. "DON'T BE A STRANGER." said Death, as the wizard hurried off. "Odd person." said War. "WITH HIM HERE, EVEN UNCERTAINTY IS UNCERTAIN, AND I'M NOT SURE EVEN ABOUT THAT."

— Interesting Times —

BUT : Fonts which include Small Capitals variants in the main font might not include every glyph from the regular font in the Small Capitals font.

3 Greek Alphabet

3.1 monotonic

In theory, modern greek is all monotonic with only an acute accent (tonos) and diaeresis (dialytika).

3.2 polytonic

Some people continue to use polytonic greek for cultural reasons.

There are far too many available variants for me to list here – I suspect that some have fallen out of use, but I do not know which. The full range for the small letter alpha includes à (psili), á (dacia), å (psili and varia), ã (dasia and varia), ä (psili and oxia), ã (dasia and oxia), ã (psili and perispomeni), ã (dasia and perispomeni), à (varia), á (oxia), à (psili and ypogegrammeni), à (dasia and ypogegrammeni), à (psili and varia and ypogegrammeni), à (dasia and varia and ypogegrammeni), à (psili and oxia and ypogegrammeni), à (dasia and oxia and ypogegrammeni), à (psili and perispomeni and ypogegrammeni), à (dasia and perispomeni and ypogegrammeni), à (vrachy), á (macron), à (varia and ypogegrammeni), à (ypogegrammeni), á (oxia and ypogegrammeni), à (perispomeni), à (perispomeni and ypogegrammeni). There are similar, but smaller, ranges of diacriticals for the other vowels and also for the letter ρ.

"Ολοι οι ἄνθρωποι γεννιοῦνται ἐλεύθεροι καὶ ἵσοι στὴν ἀξιοπρέπεια καὶ τὰ δικαιώματα. Εἶναι προϊκισμένοι μὲ λογική καὶ συνείδηση, καὶ ὥφειλουν νὰ συμπεριφέρονται μεταξύ τους μὲ πνεῦμα ἀδελφοσύνης.

4 Other variants of the latin alphabet

There are many more variations of the latin alphabet in official use throughout the world. Particularly in african countries, and also for vietnamese, some fonts which are otherwise good may have problems. For some of the african languages it is necessary to use combining diacriticals.

4.1 Dinka (South Sudan)

4.2 Ewe (Ghana and Togo)

Although this is a tonal language, and the tones can be marked with an acute accent for the rising tone, grave for the falling tone, caron for falling-rising, and circumflex for rising-falling, the tones are only written when needed to avoid ambiguity, e.g. 'mí' (we) vs 'mi' (you plural). A tilde can also be used, as here, to mark nasal vowels.

Yoruba

Unlike the other languages using this alphabet, both e and o can have dots below them (using combining accents) as in, for example, è œ. In practice, these 'dots' usually display as a small '+' in Yoruba

Gbogbo èniyàn ni a bí ní òmìnira; iyì àti ètó kòòkan sì dógbà. Wón ní èbùn ti làákàyè àti ti èrí-òkàn, ó sì yé kí wọn ó máa hùwà sí ara wọn gége bí ọmọ ìyá.

The interesting features of vietnamese are the use of horns on `o' and `u' to provide additional vowels, and the use of diacriticals to show the tone. The letters themselves are pre-composed, but displaying some of the individual tone markings requires combining accents.

5 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use '...' or "..." but in good text there are variations and this font supports:

```
left and right single quotes   double low 9 and left double
'...'                           quotes „...“
left and right double quotes   guillemets «...» and angle
“...”                           quotes <...>
single turned comma, right
single quote '...'
```

In Spanish languages, the inverted exclamation-mark ¡ and inverted question-mark ¿ are necessary.

In Irish, in real life the word `agus' and is often shortened to `ȝ' which is a symbol for the latin 'et' and it may very occasionally be seen on the web.
