

Oxygen Mono (OxygenMono-Regular.ttf from oxygen-fonts-5.4.3)

This font covers some languages written with latin alphabets, primarily those in the latin-1 codepage but also some other European languages and Turkish. Among other limitations, it lacks z with caron which makes it unusable for several West-Slavic languages, and it also lacks l with middle dot (for Catalan, l and separate middle dot is preferred) and the ij digraph which might be found in Dutch. For variations of the latin, cyrillic, and greek alphabets I attempt to show the whole alphabet, followed by Article 1 of the UDHR (it is traditional!). For the other scripts and languages I merely display the digits (if not common 0..9) and Article 1.

## 2 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use '...' or "...". but in good text there are variations and this font supports:

left and right single quotes '...'	double low 9 and left double quotes „...“
left and right double quotes "..."	guillemets «...» and angle quotes <...>
single turned comma, right single quote '...'	

In Spanish languages, the inverted exclamation-mark ¡ and inverted question-mark ¿ are necessary.
