

AR PL SungtiL GB (gbsn001p.ttf from gbsn001p-20071107)

This font covers English and simplified Chinese – the cyrillic glyphs have too much spacing. For variations of the latin, cyrillic, and greek alphabets I attempt to show the whole alphabet, followed by Article 1 of the UDHR (it is traditional!). For the other scripts and languages I merely display the digits (if not common 0..9) and Article 1.

Sources:

http://unicode.org/udhr/assemblies/first_article_all.html

<https://en.wikipedia.org>

This document was prepared using Xe_{La}T_EX and fontspec. Depending on the font, missing glyphs will be replaced either by nothing at all (occasional fonts do that), a blank space, an empty box, or some other symbol indicating a missing glyph.

1 CJK scripts

1.1 Mandarin Chinese (simplified)

人人生而自由,在尊严和权利上一律平等。他们赋有理性和良心,并应以兄弟关系的精神互相对待。

2 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use ' ... ' or " ... " but in good text there are variations and this font supports:

left and right single quotes	angle quotes <...>
'...'	and for traditional chinese and
left and right double quotes	japanese
"..."	corner brackets 「...」 and
single turned comma, right single quote	white corner brackets 『...』
'...'	

3 Symbols

3.1 Currency Symbols

Many countries have symbols for their currencies. In alphabetic order:

Cedi (Ghana)	Cruzeiro (Brazil)
Cent (many places)	\$ Dollar (many places)
Colon (Costa Rica, El Salvador)	Dong (Vietnam)

Euro	Tenge (Kazakhstan)
Hryvnia (Ukraine)	Turkish Lira
Manat (Azerbaijan)	Won (Korea)
Naira (Nigeria)	Yen (Japan)
Pound Sterling	
Rouble (Russia)	

3.2 Other symbols in text

Copyright	Registered
Dagger	§ Section
Double Dagger	Trademark
‰ Per mille	
Pilcrow
