This font covers English and Simplified Chinese. The Russian letters are unusable because of the excessive space around them. For variations of the latin, cyrillic, and greek alphabets I attempt to show the whole alphabet, followed by Article 1 of the UDHR (it is traditional!). For the other scripts and languages I merely display the digits (if not common 0..9) and Article 1.

This document was prepared using \TeX and fontspec. Depending on the font, missing glyphs will be replaced either by nothing at all (occasional fonts do that), a blank space, an empty box, or some other symbol indicating a missing glyph.

1 CJK scripts

1.1 Mandarin Chinese (simplified)

人人生而自由，生命和权利上一律平等。他们赋有理性和良心，并应以兄弟关系的精神互相对待。

2 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use ‘...’ or "...", but in good text there are variations and this font supports:

left and right single quotes angle quotes <...>
‘...’ and for traditional chinese and
left and right double quotes corner brackets [.] and
“...” and japanese corner brackets 「...」 and
single turned comma, right single white corner brackets ［...］
quote ‘...’
3 Symbols

3.1 Currency Symbols

Many countries have symbols for their currencies. In alphabetic order:

Cedi (Ghana)  
Cent (many places)  
Colon (Costa Rica, El Salvador)  
Cruzeiro (Brazil)  
$ Dollar (many places)  
Dong (Vietnam)  
Euro  
Hryvnia (Ukraine)  
Manat (Azerbaijan)  
Naira (Nigeria)  
Pound Sterling  
Rouble (Russia)  
Tenge (Kazakhstan)  
Turkish Lira  
Won (Korea)  
Yen (Japan)

3.2 Other symbols in text
